DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 11 is finally rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, i.e., New Matter.

The specification as originally filed does not provide support for the teaching of "wherein the notches of the screw cause the seasoning to fall into the grinder." as now recited in claim 11.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 8-19 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 8: a broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of

Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 8 recites the broad recitation seasoning, and the claim also recites including moist salt such as Guerande salt, which is the narrower statement of the range/limitation.

With respect to claim 11: the phrase "wherein the notches of the screw cause the seasoning to fall into the grinder" is confusing. It is not clear how the notches of the screw cause the seasoning to fall into the grinder.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 29 22 656, hereinafter DE'656.

DE'656 discloses a mill comprising a body 1, a drive shaft 4, a cover 9, grinder 5, a bowl 6 insofar as the applicant has claimed and a screw 3 with notches wherein the screw is coupled with the drive shaft and received within the receptacle.

Any remaining limitations not disclosed in the reference would have been obvious modifications by one skilled in the art once the basic apparatus was known. For example the use of a drive shaft having a square cross section is well known in the art and of no patentable merit.

Response to Arguments

7. Applicant's arguments filed 11/3/08 have been fully considered but they are not persuasive.

Applicant's argument with respect to the Pederden, Millerd and Ng references have been considered but are moot since rejections no longer relied on.

In response to applicant's argument on page 8 that the conveyor spiral (3) of the mill, operates to push the food product to be ground toward the grinding unit (5, 6), the examiner would like to point out that while the conveyor spiral (3) pushes the food product to be ground toward the grinding unit it inherently breaks up the material as well (however small amount).

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
